

Introducing AMIGO

“The Farmer’s Friend”

TELSTRA CAN HELP, MORE

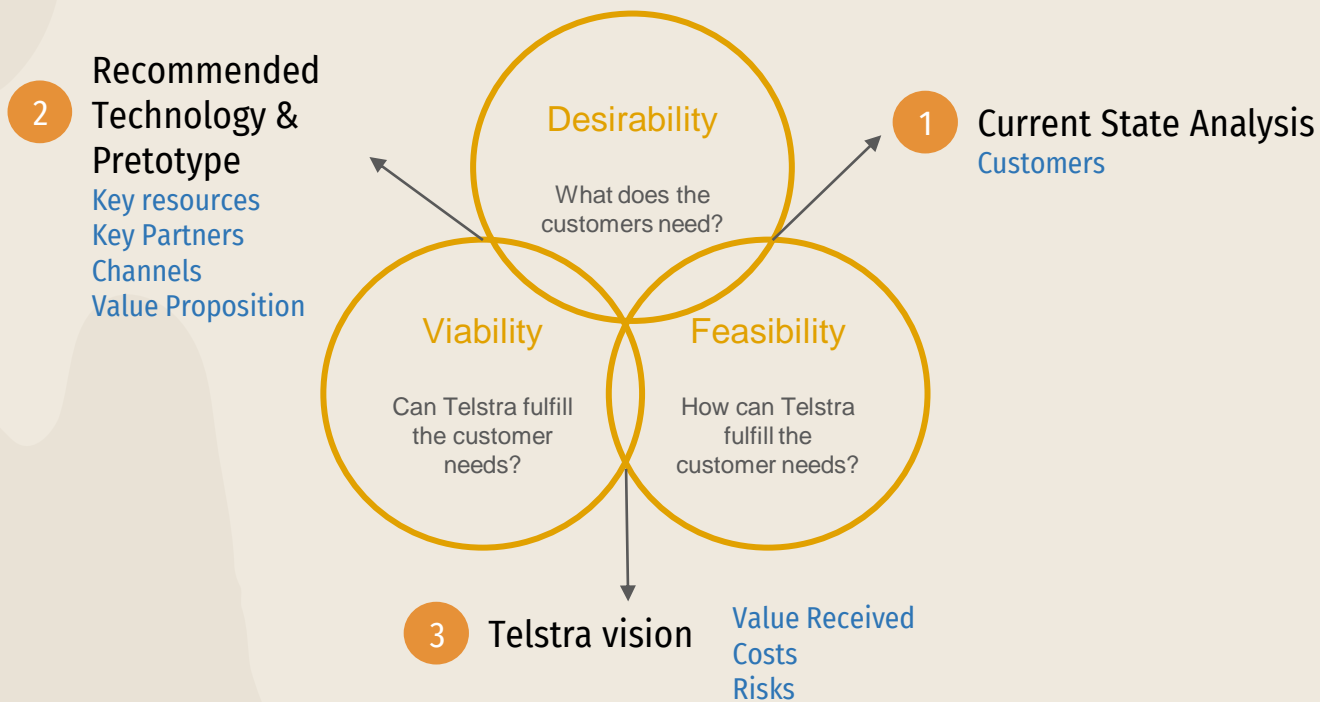

You know how *improving agriculture efficiency* can help solve the problem of *food waste* in Australia?

What we did is to provide **AMIGO** with 5G & AI Technology, to help the Australian farmers *minimise crop waste*.

Our Approach

An innovation-focused framework with the **three dimensions of DVF** was used to inform our analysis from multiple perspectives and construct an action plan.

01

Current State Analysis

Who is our target customer?
What are the current solutions?

Customer Needs: **Persona**

Profile

- Name: Kyle Anderson
- Age: 58
- Occupation: Owner of a cornfield
- Location: Bathurst, Australia

Bio

I am the owner of a cornfield in Bathurst. As also a representative of National Farmers' Federation, I feel that currently we need help to monitor and report the condition of the land - growing crops is harder than ever.

Attitudes

Learning new Technology

Collaborative

Goals

- Improve the work efficiency for all Australian farmers
- Maximising profit
- Minimising crop wastage

Concerns

- Production costs (water, labour)
- Pest & Natural Diseases
- Accidental climate change
- Reduced water allocation
- Too many wasted crops
- Lack of access to telecom

“Why my crops get spoilt and I am making a loss due to it?”

Experience & Skills

IT Knowledge

English

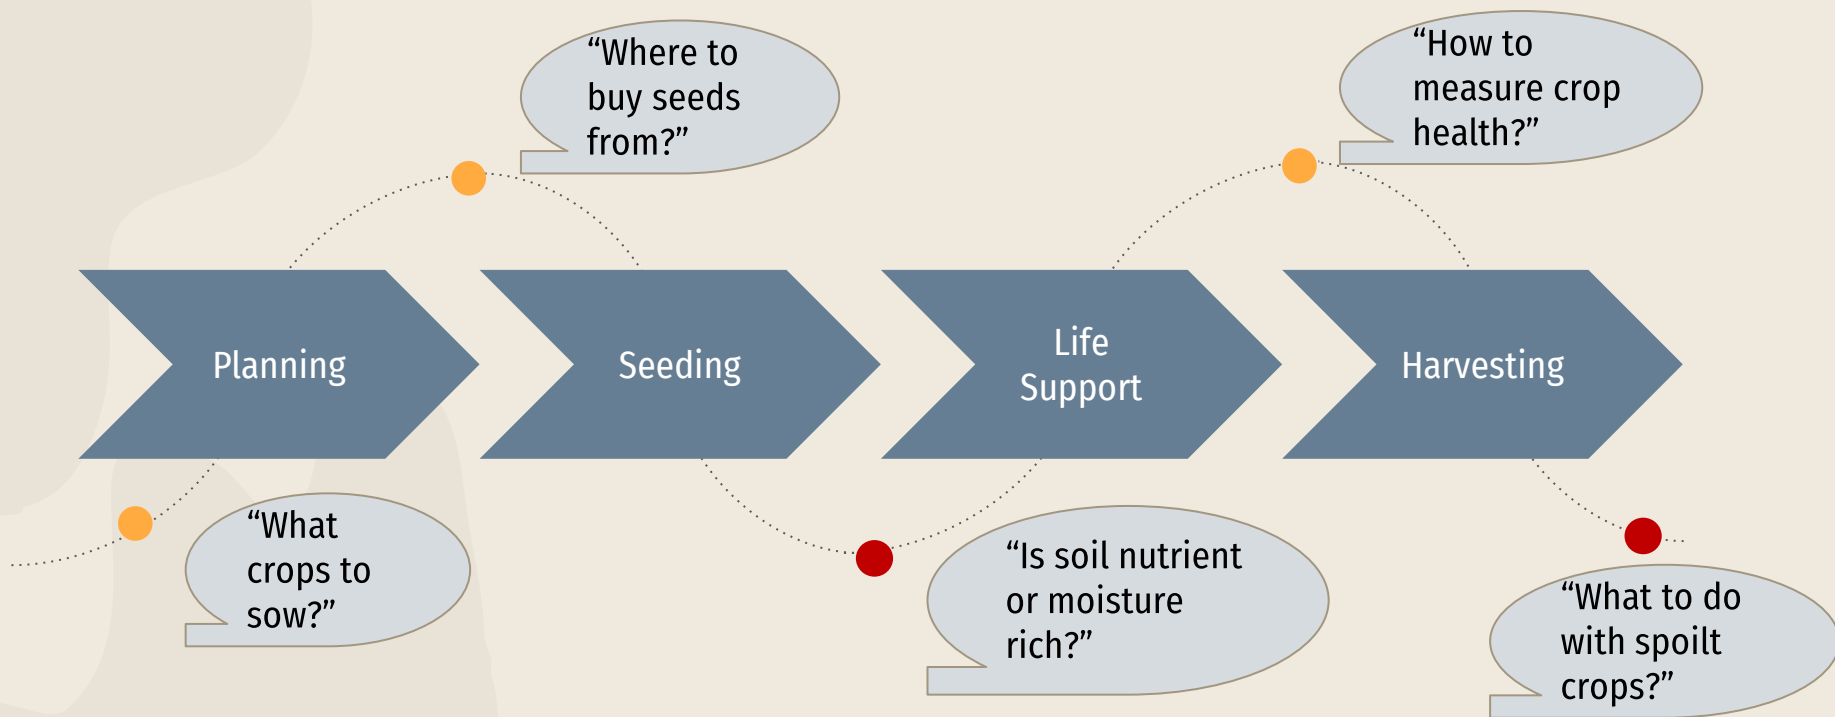

Farming Expertise

Customer Needs: Customer Journey Map

Kyle goes on a journey of the agricultural farming lifecycle.

02

Recommended IT & Pretotype

What is our recommended technology from Telstra?

What are the key resources, partners and channels of
implementing this solution?

Are there any foreseeable risks?

Recommended Technology: Telstra's solutions

We recommend Telstra to leverage the power of the **current 5G roadmap** to facilitate AI application production and fulfill Kyle's needs.

Low Band 5G - 850 MHz spectrum

Overview

This technology will power:

- **Artificial Intelligence**
- **Computer Vision**
- **Robotics**
- **Machine to Machine Connectivity**

How can it help?

1. To enable large transmit distance, bringing 5G to a larger coverage area
2. To quickly identify pest & natural Diseases in the farm.
3. To enable our robot to navigate through the farm and sensors to activate equipments.

Partners, Resources, Channels

Telstra can deliver AMIGO with the help of its strategic partners, existings resources and variable distribution channels.

Partners

- **Microsoft Azure** (2020): use the cloud to facilitate data-driven solutions to sustainability and climate commitments
- **Ericsson** (2021): provide businesses with 5G wireless platforms
- **National Farmer Federation** (2018): a legal partner ensuring Telstra fulfills regulatory & social responsibilities

Resources

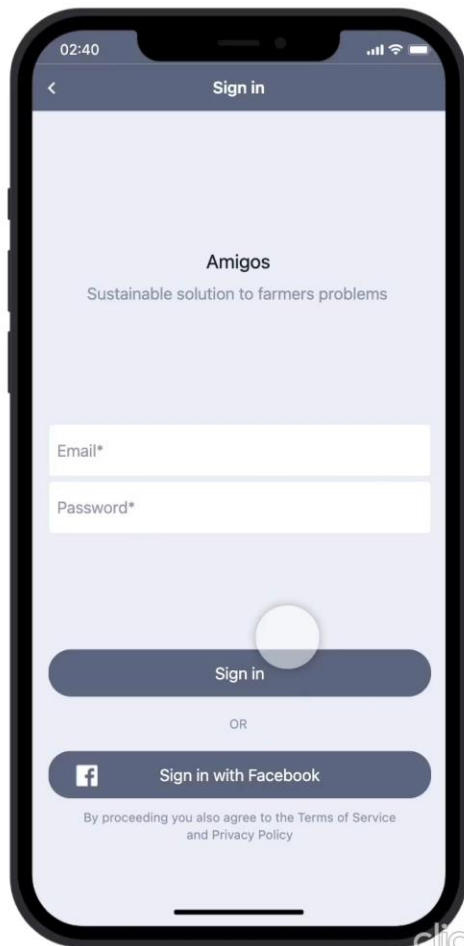

- **Human:** developers, testers, business analysts, project managers
- **Financial:** approved budget
- **Technology:**
 - Telstra's existing 5G, AI and Cloud solutions
 - Censors, Robots
 - Mobile devices

Channels

- **Direct Offer:** Download the app / log in via webpage on the Telstra website (Just as the mobile data plans!)
- **Retailer Offer:** Download the app on application stores on your mobile device

03

Telstra Vision

What can AMIGO bring to Telstra?

How much approximately will it cost for Telstra to implement AMIGO?

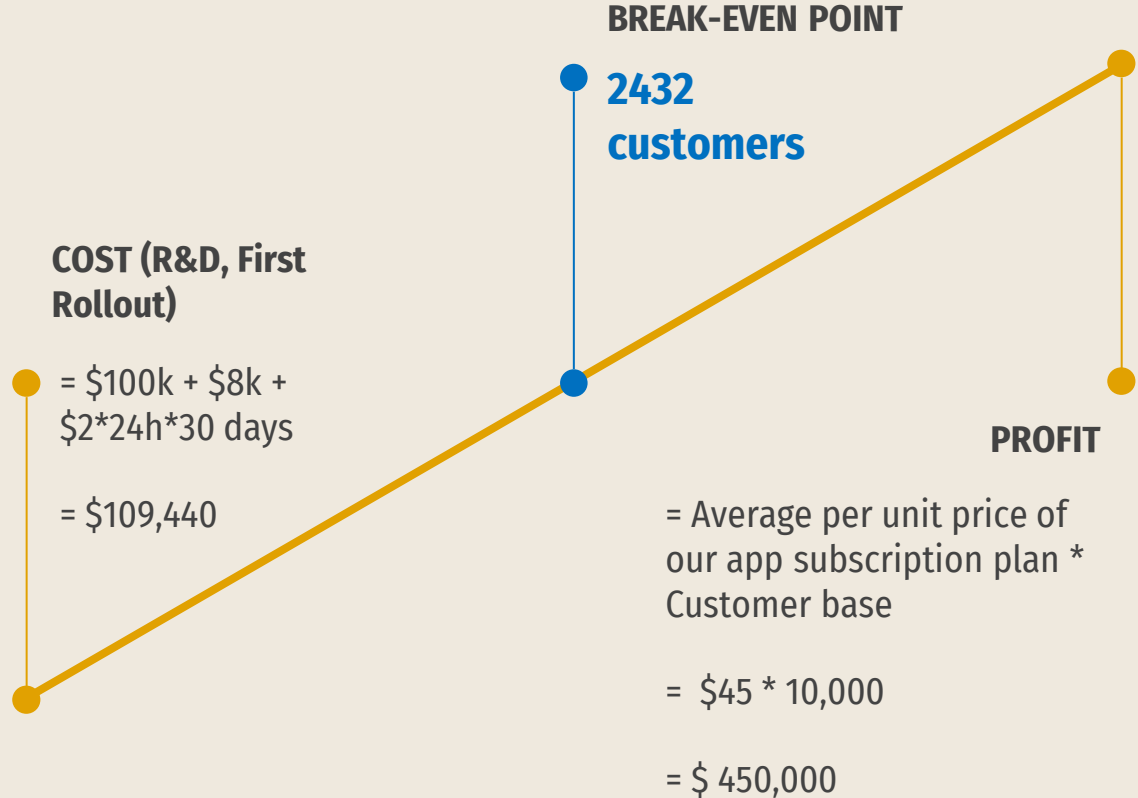

Are there any foreseeable risks?

Financial Benefits

Assumptions

- **Customer base:** Assume that 9% of the 90,000 Australian agricultural businesses will use Telstra's new service
- **Costs of implementation** are mainly from:
 - ◆ Production of AI robots: \$8k/robot
 - ◆ Development of the application: \$75k-125k
 - ◆ AI training fee: \$2/hour, a month training

Non-financial Benefits

2018

Talking 2030: Collaborated with National Farmers' Federation to blueprint the future for Australian farmers

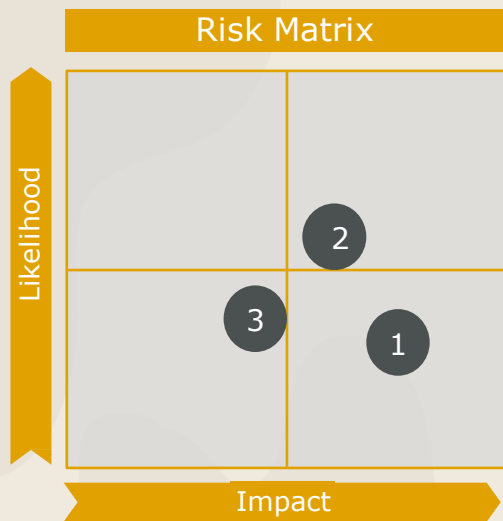

Global IoT Capability:
Partnered with Ericsson to allow global tracking of customers' IoT devices

2019

2021

World Record 5G Long Distance Call: Partnered with Ericsson to be the leader of 5G

Risk & Mitigation

	Type of Risk	Potential Risk	Mitigation
1	Change Management	Farmers might be resistant to use this application due to limited IT capability.	Leverage the power of Telstra Foundation , expand its scope to empower farmers to use the technology.
2	AI robot maintenance	Field robots might have problems in producing accurate data in the long term.	Establish an access for customers to obtain timely technical support. E.g. 24/7 hotline, Website inquiry
3	Implementation	Difficult to finalise a “one size fits all” platform	Generate user feedbacks on a regular basis. Set up a committee to govern the post-launch activities and improve the application.

A large flock of sheep, mostly white with some black, are grazing in a lush green field. In the background, there are rolling green hills and mountains under a cloudy sky. The image is framed by a large white semi-circle on the right side, which contains the text 'Thank you!'. There are also decorative yellow and white oval patterns in the bottom left and bottom right corners.

Thank you!

*Special thanks to
Our great mentor Paul Sporton
Without your help we would not be able to deliver this solution.*

Appendices

Lean Canvas

INITIATIVE:
Launch of AMIGO

DATE:
23-Sep-2021

VERSION:
1.0

PROBLEM STATEMENT(S)

"Why my crops get spoilt and I am making a loss due to it?"

SOLUTION

Develop an mobile application called "Amigo" to address the customer needs

VALUE PROPOSITION

- Maximising Australian farmers' profitability and work efficiency
- Minimising the crop waste

KEY PARTNERS

- National Farmer Federation (2018)
- Ericsson (2021)
- Microsoft Azure (2020)

CUSTOMERS

- Australian farmers in general, aged around 60
- Committee members of National Farmers' Federation

EXISTING ALTERNATIVES

- Waiting for federal government's next step and IT suppliers' reaching out to solve crop waste issues

KEY RESOURCES

- **Human:** developers, testers, business analysts, project managers
- **Financial:** approved budget
- **Technology:**
 - Telstra's existing 5G, AI and Cloud solutions
 - Sensors, Robots
 - Mobile devices

CHANNELS

- **Direct Offer:** Download the app / log in via webpage on the Telstra website
- **Retailer Offer:** Download the app on application stores on your mobile device

EARLY ADOPTERS

- Australian farmers who suffer from crop waste due to outdated technology

COSTS

Costs of implementation are assumed to be mainly from:

- Production of AI robots
- Development of the application
- AI training fee

VALUE RECEIVED

- Financial value: Can make profit by correct pricing methodologies.
- Alignment to Telstra's Technology Roadmap: This app leverages the power of Telstra's technology solutions and facilitates it with 5G.
- Brand Awareness: Partnering with NFF and continue Telstra Foundation.
